LE FRENCH CRAFTER

Dear fellow crafter,

Thank you for downloading this template!

For this build, I recommend using 1.4 to 2mm thick vegetable tanned leather for the outside piece of the hat clip, and thin goatskin leather as a liner. Make sure no oils, waxes or dyes will rub off from the liner onto any hat!

Before starting:
Make sure you print PDF file on A4 paper at %100 scale (check your printer settings) to ensure that your print will be at the original scale of the document - reference this with the Print Guide below.
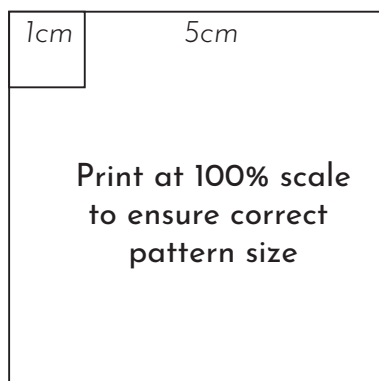

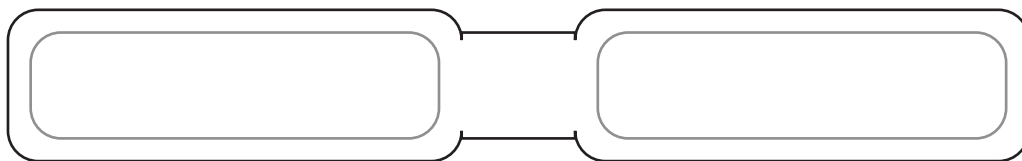

This template is made to be used with 5cm long by 1 cm wide magnets.

- Once you have your piece cut out, use neoprene glue to secure the magnets on the inside of the leather. Be careful to place the magnets so they will attact one another when closing the hat clip.
- Cut a strip of lining larger than your piece and glue it on top.
- Using a bone folder, press the liner in, revealing the magnets below.
- Stitch around the magnets.
- Cut the excess liner and finish your edges.
- Optional - sew a wide ring into the fold of your hat clip to be able to hook your hat on the wall.

Please note that this template is for personal use only and may be used for as many projects as you wish. Please do not share or sell these templates;

Thank you and happy crafting!
